-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 April 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-21 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 27 April 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claims 1 – 21 have been examined.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 – 5, 7 – 19 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cory et al. (4,373,737) in view of Giles (6,045,022) and Lange (4,593,841). Cory discloses a game carrier comprising:

- a first extendable member (Fig. 2, item 10);
- a second extendable member (Fig. 2, item 12);
- wherein a roller is coupled to a bottom end of said extendable members (Fig. 2, item 38);
- wherein a connection point is located on each extendable member proximate to said roller (Fig. 2, at the inner interface between items 10 or 12 with item 36);
- wherein said roller cannot pivot about a vertical axis (Fig. 2);
- a handle having a linkage, i.e. connection, to the top ends of said extendable members (Fig. 2, item 30 at the top of items 10 and 12);
- a plurality of securing points located on said extendable members (Fig. 2, at the inner interface between items 10 and 12 with items 30);

- a first cross member (Fig. 2, item 36);
- a second cross member, i.e. a removable stabilizer bar, (Fig. 2, item 30).

Cory does not disclose the use of flexible straps or members forming a lower platform. Giles, however, discloses a bicycle carrier comprising:

- one or more bands (Fig. 1, item 42);
- wherein said band is adjustable (column 5, lines 60 and 61);
- wherein said band is a "bungee" cord (column 5, lines 60 and 61);
- a "receptacle member" operating as a ledge (Fig. 1, item 14)
- said receptacle member coupled between a first and a second extendable member (Fig. 1);
- wherein said receptacle member is an eyelet mechanism having a substantially straight portion (Fig. 1, item 14).

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to combine the members and straps of Giles with the cart of Cory in order to provide a more stable resting place for items as well as a more secure method of holding said items.

Cory in view of Giles does not disclose a handle with a flexible linkage. Lange, however, discloses a pack cart comprising:

- a handle (Fig. 1, item 53);
- wherein said handle has a flexible linkage (Fig. 1, items 50 and 51);
- wherein said linkage is attached at a pivotable connection point (Figs. 1 and 7);
- wherein said linkage is a rod with connectors (Fig. 6);

- wherein said handle may be oriented to be essentially parallel to a first and second extendable member and may be oriented to be essentially perpendicular to a first and second extendable member (Fig. 1).

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to combine the handle of Lange with the cart of Cory in view of Giles in order to provide a modifiable and resilient connection between said handle and said cart.

Claims 6 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cory et al. (4,373,737) in view of Giles (6,045,022) and Lange (4,593,841) as applied to claims 1 – 5, 7 – 19 and 21 above, and further in view of Vore (785,029). Cory in view of Giles does not disclose the use of castor type rollers. Vore, however, discloses a box roller comprising:

- roller pivotable about a vertical axis (Fig. 2, item 8).

It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to combine the rollers of Vore with the cart of Cory in view of Giles and Lange in order to provide the cart operator with additional maneuverability when pulling said cart.

Response to Arguments

Applicant's arguments, see page 8, filed 4/27/2006, with respect to the drawings have been fully considered and are persuasive. The objection of 1/31/2006 has been withdrawn.

Applicant's arguments, see page 8, filed 4/27/2006, with respect to claim informalities have been fully considered and are persuasive. The objection of 1/31/2006 has been withdrawn.

Applicant's arguments, see pages 8 and 9, filed 4/27/2006, with respect to 35 U.S.C. § 112 have been fully considered and are persuasive. The rejection of 1/31/2006 has been withdrawn.

Applicant's arguments with respect to claims 1 – 12 under 35 U.S.C. § 103 have been considered but are moot in view of the new ground(s) of rejection.

New grounds for rejection have been necessitated by Applicants claim amendments.

Applicant states, "...submits that the Cory et al. and Giles references are two that should not be combined. Giles appears to disclose a front mounted bicycle carrier. The

carrier does not have wheels, nor does it have a handle...does not articulate a motivation, suggestion, or teaching...”

Giles provides a reference of a material carrying apparatus which makes use of, among other things, eyebolt support arms and bungee cords. One skilled in the art would recognize these as common components for carrying, supporting and securing a myriad of material types. As such, the combination of Giles and Cory is proper as Giles addresses a common problem. Motivation is given in the above, as well as the prior rejection.

For this reason, the rejections stand.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Skyes (3,007,710) discloses a collapsible cart;
- Davis (4,040,642) discloses a collapsible luggage carrier;
- Walker (4,205,863) discloses a wheeled carrier for suitcases;
- Clemence et al. (4,915, 408) disclose a collapsible trolley;
- Cheng (5,127,664) discloses a trolley with improved telescopic tubes;
- Wong (6,095,534) discloses a collapsible luggage cart;
- Tsai (6,357,080) discloses a multi-section retractable handle;
- Forman (2,729,460) discloses a collapsible luggage dolly;

- Hyman (Re. 28,067) discloses a collapsible rod.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John D. Walters whose telephone number is (571) 272-8269. The examiner can normally be reached on Monday - Friday, 8am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Ellis can be reached on (571) 272-6914. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
